Commentary

Mr Price Group Limited delivered double digit earnings and dividend growths in tough economic and retail environments. Retail sales in both the apparel and homeware segments grew ahead of the market for the period, as reported by Stats SA.

Total revenue grew 7.8% to R10.5bn supported by retail sales growth of 6.6% (comparable stores 3.9%) to R9.7bn. Other income, mainly from financial services and cellular, grew 24.7% to R801m. Cash sales which constitute 83.4% of total sales grew 7.5% while credit sales increased 2.2%. Local retail sales increased 6.2% while non-South African sales grew 11.4%, aided by the acquisition of the Kenyan franchise stores in May 2018. Retail selling price inflation was 4.5% and 100m units were sold, an increase of 2.9%. By opening 34 new stores and expanding 2, weighted average space grew by 3.7%. After closing 6 and reducing the size of 13 stores, net weighted average space growth was 1.4%, taking the total number of corporate owned stores to 1 286. Group sales densities increased 6.2% as space optimisation initiatives continue to deliver the desired results.

Merchandise and cellular gross margin gains contributed to the group, improving its gross profit margin by 60bps to 42.6%. Merchandise margins improved 80bps to 43.3% as continued product execution resulted in more full priced items being sold. Cellular margins increased 30bps to 19.1%. Selling and administration expenses increased 7.7% (excluding Kenya 6.6%), positively impacting operating profit growth, which was up 10.9% to R1.7bn. The operating margin improved from 15.7% to 16.2% of retail sales and other income (RSOI).

The Apparel segment grew RSOI by 6.2% to R7.3bn. Operating profit increased 11.2% off a strong base, particularly in MRP Apparel and Miladys. The operating margin increased from 16.1% to 16.9%. Sales in MRP Apparel increased 5.9% (comparable 3.0%) to R5.9bn. Online sales grew at 31.6%, supporting the omni channel strategy. Miladys grew sales 8.3% (comparable 8.2%). MRP Sport reported improved performance with sales growth of 7.3% (comparable 2.3%), with online sales growing at 40.4%.

The Home segment increased RSOI by 7.2% to R2.4bn. Operating profit increased 13.8% and the operating margin increased from 13.4% to 14.3%. Sales in MRP Home were up 9.2% (comparable 6.6%) with improved sales in bedroom and furniture departments and growth in the online channel of 29.0%. Sheet Street grew sales by 4.5% (comparable 2.5%).

The Financial Services & cellular segment reported growth of 23.5% lifting revenue to R673m. Interest and fees increased 7.5% to R246m, insurance revenue grew 7.6% to R131m, while cellular revenue accelerated to R296m, an increase of 52.3%. Cellular products are now sold through 249 locations across the group and its centralised call centre.

The group's financial position remains healthy. Net asset value per share increased by 15.6% to 2 967 cents. Cash and cash equivalents increased 63.8% to R2.6bn. Capital expenditure of R173m was incurred primarily relating to store development activities. Inventory levels were 7.3% higher in order to better manage the transition of seasons and peak season supply chain risks. The debtors book remains well managed, with a retail net bad debt to book ratio of 6.2% (8.4% including collection costs) and an IFRS 9 impairment provision of 8.3%.

Independent research has confirmed that consumers' perception of MRP Apparel's quality and fashion has improved relative to competitors, and that their price positioning has been further entrenched. Declining GDP growth in South Africa and rising fiscal challenges, as noted in the most recent medium term budget speech, points to further challenging trading conditions ahead for South African retailers. Despite this, the Group remains confident that the fashion value business model is well positioned to capture further market share.

Notes:

1. The interim results at September 2018 and 2017, for which the directors take full responsibility, have not been audited. The condensed consolidated results at 31 March 2018, which are not itself audited, have been correctly extracted from the audited annual financial statements upon which Ernst & Young Inc. issued an unqualified opinion. The interim results were prepared under the supervision of Mr MM Blair, CA(SA), Chief Financial Officer (CFO).

2. The financial statements have been prepared in accordance with the Companies Act of South Africa.

3. The disaggregated revenue is as follows:

R'm	2018 29 Sep	2017 30 Sep^	2018 31 Mar^
Revenue from contracts with customers	10 165	9 451	20 669
Retail sales	9 738	9 135	19 994
Insurance premium	131	121	257
Cellular and mobile income	296	195	418
Interest and charges on debtors	246	229	467
Other sundry income	25	31	49
Finance income	103	67	162
Revenue	10 539	9 778	21 347

^Comparatives are based on IAS 18 'Revenue'.

Revenue from contracts with customers is recognised at a point in time, except where revenue has been earned through mobile contracts where services are transferred over time.

4. In May 2017 litigation was instituted by the National Credit Regulator (NCR) in the National Credit Tribunal (NCT) to declare the group to have acted in contravention of the National Credit Act in relation to Miladys Club fee charges. The NCR requested that the NCT order the group to refund all club fees to customers from 2007 to date and pay a fine of 10% of the group's annual turnover. The group opposed the referral and following due process, is awaiting a hearing date before the NCT. Notwithstanding that the NCT is appealing the high court's ruling of a similar matter in favour of Edcon, the group is optimistic that the Miladys matter will ultimately have a positive outcome. The directors are of the opinion that the likelihood of the liability is remote.

5. During the 2018 financial year, the company received an assessment from SARS relating to the disallowance of certain deductions claimed in the 2014 year of assessment. The assessment amounted to additional income tax of R65.1m, as well as interest and penalties charged to 30 September 2018 amounting to R36.8m. The assessed tax may result in of a reallocation of deferred tax to current tax of R59.5m and additional current tax of R5.6m. The overall potential impact on the income statement (including interest and penalties) therefore amounts to R42.4m. The company, supported by senior

counsel's opinion, appealed the decision of the Commissioner to disallow its objection to the assessment. No adjustments have been made to the financial statements as the directors are of the opinion that the likelihood of the liability is remote.

6. The fair value of FECs as calculated by the banks is measured using a forward pricing model. The significant inputs into the Level 2 fair value of FECs are yield curves, market interest rates and market foreign exchange rates. The estimated fair values of recognised financial instruments approximate their carrying amounts.

7. The acquisition of 12 Kenyan franchise stores from Deacons East Africa Plc was completed on 18 May 2018 for a consideration of R19 million. The stores were rebranded and merchandised and re-opened for trade as corporate owned stores. This is accounted for as a business combination. The amounts for assets and liabilities assumed at the date of acquisition, measured on a provisional basis are as follows:

R'm	Fair value
Plant and equipment	19
Inventory	-*
Net identifiable assets acquired	19

*less than R1 million

From the date of acquisition, revenue contributed was R57m and net loss contributed was R12.6m, affected by once off startup costs.

8. The accounting policies and estimates applied are in compliance with IFRS including IAS 34 Interim Financial Reporting, as well as the SAICA Financial Reporting Guides and Financial Pronouncements as issued by the Financial Reporting Standards Council and are consistent with those applied in the 2018 annual financial statements. All new and revised Standards and Interpretations that became effective during the period were adopted and did not lead to any material changes in accounting policies, except for those referred in note 9.

9. The group applied both IFRS 9 'Financial Instruments' and IFRS 15 'Revenue from Contracts with Customers' using the modified retrospective approach, by recognising the cumulative effect of initially applying IFRS 9 and IFRS 15 as an adjustment to the opening balance of equity at 1 April 2018. Therefore the comparative information has not been restated and continues to be reported under IAS 18 'Revenue' and IAS 39 'Financial Instruments'.

   The key impact of IFRS 9 is the new impairment model for financial assets, impacting MRP Money division. The new impairment model reflects expected credit losses based on forward-looking information as opposed to incurred credit losses under IAS 39. The group has adopted the general impairment approach for retail debtors (R7m increase on opening balance of provision) and the simplified approach for mobile debtors (R4m increase on opening balance of provision). The combined deferred tax impact is an increase in deferred tax (R3m increase in deferred tax asset). Refer to the statement of changes in equity for the impact on opening retained income. IFRS 9 has been applied prospectively for hedge accounting and has no impact on the comparative figures.

   IFRS 15 key areas of impact are changes in timing and amount of recognition of MRP Mobile contract revenue (R5m increase in opening balance of contract asset) and the recognition of the right of return liability (R12m increase in opening balance) and related right of return asset (R7m increase in opening balance) now recognised on a gross basis. The credit note provision of R4m was derecognised. The combined deferred tax impact is a decrease in deferred tax (R1m decrease in deferred tax asset). Refer to the statement of changes in equity for the impact on opening retained income.
