# @mrprice group limited

This short-form announcement is the responsibility of the Mr Price Group Limited board of directors and is a summary of the information in the detailed results announcement available on https://senspdf.jse.co.za/documents/2025/JSE/ISSE/MRPE/20112025.pdf and https://www.mrpricegroup.com and does not contain full or complete details. The information contained in this announcement has not been reviewed or reported on by the company's auditors. These documents and the results presentation to the investment community are available on the group's website at www.mrpricegroup.com and copies may be requested from the company secretary (Legal@Mrpricegroup.com or +27 31 310 8000). Any investment decision in relation to the company's shares should be based on the full announcement.

# Interim cash dividend declaration

An interim of 323.20 cents per share (258.56 cents net of dividend withholding tax of 20% for shareholders who are not exempt) was declared. The dividend has been declared from income reserves. The salient dates for the dividend are as follows:

Last date to trade 'cum' dividend	Tuesday	09 December 2025
Date trading commences 'ex' dividend	Wednesday	10 December 2025
Record date	Friday	12 December 2025
Payment date	Monday	15 December 2025

Note: Shareholders may not dematerialise or rematerialise their share certificates between Wednesday, 10 December 2025 and Friday, 12 December 2025, both dates inclusive.

### Commentary: Positive earnings growth amid challenging trading conditions

For the 26 weeks ended 27 September 2025 ("Period"), Mr Price Group increased total revenue by 5.4% to R18.6bn. The group's retail sales growth of 5.5%, was higher than the comparable market's sales growth of 5.3% (RLC: April 2025 - September 2025). Despite a highly promotional retail sector for most of the period, the group expanded its gross profit (GP) margin by 30bps to 40.0% and delivered positive operating leverage through strict cost control, expanding its operating margin by 10bps to 11.5%.

Basic and headline earnings per share of 512.8 cents and 513.0 cents were up 6.5%. Diluted headline earnings per share grew 6.4% to 497.9 cents.

Despite the group's ability to deliver positive earnings growth for H1, the sales performance is reflective of a consumer environment that remains constrained. The prolonged period of negative real wage growth through 2022 and 2023 has had lasting impact, compromising household disposable income with resultant weak levels of consumer expenditure. Short-term relief through lower interest rates and inflation has not been sufficient to offset these effects, resulting in limited discretionary spending capacity. Continued negative consumer confidence emphasises this challenging environment.

Group CEO Mark Blair said, "I am pleased that we have once again executed our strategic intent of maximising sales growth at improved margins. Our gross margin increased despite a very challenging retail environment. Our value focused business model enabled us to effectively manage overheads and ensure that we consistently deliver positive earnings growth and returns to shareholders."

An interim dividend of 323.2 cents per share was declared, up 6.5% and a pay-out ratio of 63% was maintained.

#### **GROUP RESULTS SUMMARY**

Group retail sales of R17.8bn increased 5.5% and comparable store sales increased 2.1%. Other revenue of R625m decreased 1.6%.

The first quarter of H1 was characterised by shifting school holiday periods and base effects, particularly in the months of April and June. The group's Q1 retail sales growth of 6.3% resulted in market share gains but faced GP margin compression of 20bps due to markdowns required in the month of June. The group along with the rest of the sector reported negative sales growth for the month. The timely markdown activity in June and effective stock management enabled it to exit the winter season with a clean stock position.

As a result, fresh spring and summer inputs from Q2 enabled more full priced sales for the remainder of the period, albeit at lower growth levels than Q1, up 4.7% as the consumer environment deteriorated. The rest of the market was highly promotional in these months, with deep discounting prevalent across the sector. Consequently, the group's sales growth was in line with the market but came at improved GP margins compared to the prior year.

Group store sales increased 5.4% and online sales were up 9.7%. The group's omni-channel strategy continues to be effective and aligned with customers shopping preferences. Total unit sales increased 2.5% and retail selling price (RSP) inflation of 3.0% remained below CPI, as focus remained on delivering value to customers through the group's Every Day Low Price model.

The group opened 91 new stores during the period, growing its total store base to 3100 stores and increasing weighted average trading space by 3.5%. New stores across the group's portfolio continue to deliver strong returns.

Cash sales increased 5.6% and constituted 88.2% of retail sales. Credit sales grew 4.3%, driven primarily by existing account holders and the group approved 22.6% of new account applications. The latest Transunion Consumer Credit Index has signalled a modest improvement in household credit health, however the group's strict affordability

criteria remains appropriate.

The GP margin increased 30bps to 40.0%. Effective stock management ensured a smooth transition out of winter and into fresh spring/summer merchandise, enabling all trading segments to expand their margins in Q2.

Profit from operating activities increased 5.7% to R2.1bn. Effective cost control initiatives ensured total expense growth was contained at 5.6%, despite trading space growth. Operating margin increased 10bps to 11.5% of retail sales and other revenue. The group's operating margin in H1 is typically seasonally lower than H2.

Financial Services revenue decreased 0.8% to R469m. Debtors' interest and fees were 1.2% lower due to a 100bps reduction in the repo rate compared to the prior period. The group's prudent credit granting approach has enabled it to maintain its net bad debt to book ratio at low levels relative to the sector. It remains sufficiently provided for and will continue to manage its debtors' book cautiously.

The group's inventory management approach is data led and driven by tried and tested processes. It remains a key competitive advantage which has enabled it to expand its margins despite a volatile period of trade for the sector. At the end of the period, gross inventory was 4.5% higher and stock freshness (0 - 3 months ageing) remained healthy.

Capital expenditure of R574m was allocated and the annual capex forecast of approximately R1.5bn remains, which includes the Gauteng DC enhancement and approximately 200 new stores. The group ended the period debt free, with cash resources of R3.0bn and a cash conversion ratio of 81.8%.

#### OUTLOOK

The outlook for the consumer environment is fragile in the short-term, with hopeful improvement in 2026 supported by a lower inflationary and interest rate environment. Volatility in spending patterns are likely to persist as the monthly window for consumer spending is limited by constrained disposable income levels. Increasing food inflation and divergence in discretionary spending will likely place additional drain on share of wallets.

Consumers have become increasingly value-seeking and the group's diversified portfolio of brands remain well placed in their customer positioning. The group's investment into its brand strength and omni-channel platforms keep it closely aligned with its customers' needs. Its ongoing merchandise execution, focusing on delivering affordable fashion trends at high volumes, supported by leading inventory management and an agile supply chain, has enabled it to deliver consistent earnings growth. Its 3-year HEPS CAGR remains well ahead of the competitor set.

The base becomes increasingly more challenging in the remainder of the financial year, due to the two-pot withdrawals and combined with improved consumer affordability (lowering inflation and interest rate cuts) which supported increased consumer expenditure ahead of the festive season in the prior year. Sales calls ahead of these key months in 2025 have accounted for these factors and the broader macroeconomic conditions. Significant improvements in the operational capacity of the Durban port have positively impacted stock-flow and inventory management ahead of the key trading months. Retail sales in the first 7 weeks of H2 were up 3.3% against a firm base of 12.3%, with momentum improving from October to November.

As has been previously communicated, considerable progress has been made in the group's strategic research informing capital allocation decisions for future investment. This includes the evaluation of organic and acquisitive growth opportunities in existing and other high-potential markets.

Blair said, "I have strong confidence in our team, and their ability to continue achieving consistent earnings performances while also delivering for the future. We remain focused on execution across the business and providing value to all our stakeholders."

#### MR PRICE GROUP INTERIM RESULTS FOR THE 26 WEEKS ENDED 27 SEPTEMBER 2025

For the 26 weeks ended 27 September 2025 ("Period"), Mr Price Group increased total revenue by 5.4% to R18.6bn. The group's retail sales growth of 5.5%, was higher than the comparable market's sales growth of 5.3% (RLC: April 2025 - September 2025). Despite a highly promotional retail sector for most of the period, the group expanded its gross profit (GP) margin by 30bps to 40.0% and delivered positive operating leverage through strict cost control, expanding its operating margin by 10bps to 11.5%.

Basic and headline earnings per share of 512.8 cents and 513.0 cents were up 6.5%. Diluted headline earnings per share grew 6.4% to 497.9 cents.

Despite the group's ability to deliver positive earnings growth for H1, the sales performance is reflective of a consumer environment that remains constrained. The prolonged period of negative real wage growth through 2022 and 2023 has had lasting impact, compromising household disposable income with resultant weak levels of consumer expenditure. Short-term relief through lower interest rates and inflation has not been sufficient to offset these effects, resulting in limited discretionary spending capacity. Continued negative consumer confidence emphasises this challenging environment.

Group CEO Mark Blair said, "I am pleased that we have once again executed our strategic intent of maximising sales growth at improved margins. Our gross margin increased despite a very challenging retail environment. Our value focused business model enabled us to effectively manage overheads and ensure that we consistently deliver positive earnings growth and returns to shareholders."

An interim dividend of 323.2 cents per share was declared, up 6.5% and a pay-out ratio of 63% was maintained.

#### **Group results summary**

Group retail sales of R17.8bn increased 5.5% and comparable store sales increased 2.1%. Other revenue of R625m decreased 1.6%.

The first quarter of H1 was characterised by shifting school holiday periods and base effects, particularly in the months of April and June. The group's Q1 retail sales growth of 6.3% resulted in market share gains but faced GP margin compression of 20bps due to markdowns required in the month of June. The group along with the rest of the sector reported negative sales growth for the month. The timely markdown activity in June and effective stock management enabled it to exit the winter season with a clean stock position.

As a result, fresh spring and summer inputs from Q2 enabled more full priced sales for the remainder of the period, albeit at lower growth levels than Q1, up 4.7% as the consumer environment deteriorated. The rest of the market was highly promotional in these months, with deep discounting prevalent across the sector. Consequently, the group's sales growth was in line with the market but came at improved GP margins compared to the prior year.

Group store sales increased 5.4% and online sales were up 9.7%. The group's omni-channel strategy continues to be effective and aligned with customers shopping preferences. Total unit sales increased 2.5% and retail selling price (RSP) inflation of 3.0% remained below CPI, as focus remained on delivering value to customers through the group's Every Day Low Price model.

The group opened 91 new stores during the period, growing its total store base to 3100 stores and increasing weighted average trading space by 3.5%. New stores across the group's portfolio continue to deliver strong returns.

Cash sales increased 5.6% and constituted 88.2% of retail sales. Credit sales grew 4.3%, driven primarily by existing account holders and the group approved 22.6% of new account applications. The latest Transunion Consumer Credit Index has signalled a modest improvement in household credit health, however the group's strict affordability criteria remains appropriate.

The GP margin increased 30bps to 40.0%. Effective stock management ensured a smooth transition out of winter and into fresh spring/summer merchandise, enabling all trading segments to expand their margins in Q2.

Profit from operating activities increased 5.7% to R2.1bn. Effective cost control initiatives ensured total expense growth was contained at 5.6%, despite trading space growth. Operating margin increased 10bps to 11.5% of retail sales and other revenue. The group's operating margin in H1 is typically seasonally lower than H2.

Segmental performance		
	Retail sales growth	Cont. to retail sales
H1 FY2026 vs H1 FY2025		
Apparel segment	5.3%	78.5%
Home segment	5.1%	17.7%
Telecoms segment	12.4%	3.8%
Total group	5.5%	-

Retail sales for the Apparel segment increased 5.3% to R14.0bn, outperforming the comparable market's (RLC) sales growth of 4.7% and comparable store sales grew 1.7%. In Q2, retail sales growth slowed for the segment and the comparable market as the consumer environment softened. During the period, Mr Price Apparel maintained market share and expanded GP margin, despite the comparable market's sales being highly promotional. On a 12-month basis the division has gained over R200m in market share. Miladys and Mr Price Sport continued to report improved sales growth. Power Fashion reported its 14th consecutive quarter of market share gains and delivered the highest sales growth in the segment, while Studio 88 delivered a solid margin accretive sales performance despite high levels of discounting in the branded apparel competitor environment.

The Homeware segment's retail sales increased 5.1% to R3.2bn and delivered comparable store sales growth of 4.3%. The comparable market was highly promotional throughout the period, while all of the group's homeware divisions further expanded GP margins, driven by lower markdowns than the prior year. Yuppiechef continued its omni-channel expansion, reporting double-digit sales growth and has now gained market share for 18 consecutive months.

The Telecoms segment continued its trend of delivering double-digit sales growth (+12.4% to R678m) and market share gains (+50bps per GfK). Mr Price Cellular's stand-alone store roll-out momentum continued, with a further 12 stores opened during the period, closing its footprint at 73, in addition to the existing 481 combo stores. The segment further expanded its margins during the period, supported by both the Cellular (handsets and accessories) and Mobile offerings.

Financial Services revenue decreased 0.8% to R469m. Debtors' interest and fees were 1.2% lower due to a 100bps reduction in the repo rate compared to the prior period. The group's prudent credit granting approach has enabled it to maintain its net bad debt to book ratio at low levels relative to the sector. It remains sufficiently provided for and will continue to manage its debtors' book cautiously.

The group's inventory management approach is data led and driven by tried and tested processes. It remains a key competitive advantage which has enabled it to expand its margins despite a volatile period of trade for the sector. At the end of the period, gross inventory was 4.5% higher and stock freshness (0 - 3 months ageing) remained healthy.

Capital expenditure of R574m was allocated and the annual capex forecast of approximately R1.5bn remains, which includes the Gauteng DC enhancement and approximately 200 new stores. The group' ended the Period debt free, with cash resources of R3.0bn and a cash conversion ratio was of 81.8%.

#### Outlook

The operating environment in South Africa has continued to mirror the volatility of the global economy. GDP growth improved in Q2 2025, up 0.8% from the 0.1% reported in Q1 2025. However, these levels are not supportive of creating a sufficiently buoyant economy to enable strong business growth. There have been some areas of improvement under the government of national unity, but more significant progress is required of national structural reforms to stimulate job creation and create more sustainable levels of economic growth.

The outlook for the consumer environment is fragile in the short-term, with hopeful improvement in 2026 supported by a lower inflationary and interest rate environment. Volatility in spending patterns are likely to persist as the monthly window for consumer spending is limited by constrained disposable income levels. Increasing food inflation and divergence in discretionary spending will likely place additional drain on share of wallets.

Consumers have become increasingly value-seeking and the group's diversified portfolio of brands remain well placed in their customer positioning. Mr Price Apparel remains the most shopped apparel retailer in South Africa (MAPS 2025) and leads the Fashion-value matrix (Borderless Access), highlighting its differentiated fashion and accessible pricing. Mr Price Apparel, Mr Price Sport and Mr Price Home reported the highest brand equity in their respective segments, a leading metric for brand health and customer affinity. Power Fashion reported the highest increase in brand equity, testament to its successful store roll-out strategy and customer acquisition performance.

The group's investment into its brand strength and omni-channel platforms keep it closely aligned with its customers' needs. Its ongoing merchandise execution, focusing on delivering affordable fashion trends at high volumes, supported by leading inventory management and an agile supply chain, has enabled it to deliver consistent earnings growth. Its 3-year HEPS CAGR remains well ahead of the competitor set.

The base becomes increasingly more challenging in the remainder of the financial year, due to the two-pot withdrawals and combined with improved consumer affordability (lowering inflation and interest rate cuts) which supported increased consumer expenditure ahead of the festive season in the prior year. Sales calls ahead of these key months in 2025 have accounted for these factors and the broader macroeconomic conditions. Significant improvements in the operational capacity of the Durban port have positively impacted stock-flow and inventory management ahead of the key trading months. Retail sales in the first 7 weeks of H2 were up 3.3% against a firm base of 12.3%, with momentum improving from October to November.

As has been previously communicated, considerable progress has been made in the group's strategic research informing capital allocation decisions for future investment. This includes the evaluation of organic and acquisitive growth opportunities in existing and other high-potential markets.

Blair said, "I have strong confidence in our team, and their ability to continue achieving consistent earnings performances while also delivering for the future. We remain focused on execution across the business and providing value to all our stakeholders."

#### INTERIM CASH DIVIDEND DECLARATION

Notice is hereby given that an interim gross cash dividend of 323.20 cents per share was declared for the 26 weeks ended 27 September 2025, a 6.5% increase against the prior year. As the dividend has been declared from income reserves, shareholders, unless exempt or who qualify for a reduced withholding tax rate, will receive a net dividend of 258.56 cents per share. The dividend withholding tax rate is 20%.

The issued share capital at the declaration date is 262 348 260 listed ordinary and 1 236 022 unlisted B ordinary shares. The tax reference number is 9285/130/20/0.

The salient dates for the dividend will be as follows:

Last date to trade 'cum' the dividend

Date trading commences 'ex' the dividend

Record date

Payment date

Tuesday

Wednesday

Friday

12 December 2025

Monday

Monday

15 December 2025

Shareholders may not dematerialise or rematerialise their share certificates between Wednesday, 10 December 2025 and Friday, 12 December 2025, both dates inclusive.

Shareholders should note that dividend payments will be paid via electronic transfer into the bank accounts of shareholders whose banking details are held by the company's transfer secretaries, Computershare Investor Services (Pty) Ltd ("Computershare"). Shareholders whose bank account details are not held by Computershare are requested to provide such details to Computershare on 0861 100 950 to enable payment of the dividend and all future dividends. Where shareholders do not provide the transfer secretaries with their banking details, the dividend will not be forfeited, but will be marked as "unclaimed" in the share register until the shareholder provides the transfer secretaries with the relevant banking details for payout.

The dividend was approved by the Board in Durban on 19 November 2025.

#### SEGMENTAL REPORTING

For management reporting purposes, the group has reported business units based on how the group's chief decision makers operate the business.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss.

The five reportable segments are as follows:

- The Apparel segment retails clothing, sportswear, footwear, sporting equipment and accessories. This segment includes the following trading divisions: Mr Price Apparel, Mr Price Sport, Miladys, Power Fashion and the Studio 88 group.
- The Home segment retails homeware and furniture. This segment includes Mr Price Home, Sheet Street and Yuppiechef.
- The Financial Services segment manages the group's trade receivables and sells financial services products.
- The Telecoms segment sells cellular products and services.
- The Central Services segment provides chargeable and non-chargeable services to the trading segments noted. The trading segments are only allocated costs for information technology, distribution costs and shared services costs which is done in proportion to their relative sales contribution to the group. All remaining centre of excellence costs (corporate and governance services) which are not directly related to the running of the segments are not charged out. Segments are managed on a targeted operating margin percentage basis sufficient to cover the demand of unallocated service costs relating to these cost centres. Net finance income and income taxes are managed at a group level and are not allocated to operating segments.

#### Notes:

- 1. The interim results at 27 September 2025 and 28 September 2024, for which the directors take full responsibility, have not been audited. The condensed consolidated results at 29 March 2025, which are not itself audited, have been extracted from the audited annual financial statements upon which Deloitte & Touche issued an unqualified opinion. The interim results were prepared under the supervision of Mr P Nundkumar, CA(SA), Chief Financial Officer.
- 2. The interim results are prepared in accordance with the requirements of the JSE Limited Listings Requirements and the requirements of the South African Companies Act 71 of 2008. The JSE Limited Listings Requirements require interim results to be prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) and the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council and to also, as a minimum, contain the information required by IAS 34 Interim Financial Reporting. The accounting policies applied in the preparation of the condensed consolidated financial statements are in terms of IFRS and are consistent with those applied in the previous consolidated annual financial statements.
- 3. The disaggregated revenue is as follows:

	2025	2024	2025
R'm	27 Sep	28 Sep	29 Mar
Retail sales	17 833	16 902	39 439
Insurance revenue	103	124	206
Telecoms income (non-retail)	95	89	180
Interest and fees charged on debtors	366	349	712
Club fees	18	17	34
Sundry income	43	57	144
Retail sales and other revenue	18 458	17 538	40 715
Finance income	116	91	218
Revenue	18 574	17 629	40 933
Tender type Retail sales	17 833	16 902	39 439
Cash sales	15 730	14 884	35 204
Credit sales	2 103	2 018	4 235

Revenue from contracts with customers is recognised at a point in time, except where revenue has been earned through mobile contracts where services are transferred over time.

- 4. During the 2021 financial year, the company received assessments from SARS relating to the disallowance of certain deductions claimed in the 2015 to 2017 years of assessment. In June 2022, SARS raised assessments disallowing certain deductions, as well as including receipts of a capital nature in taxable income, for the 2018, 2019 and 2020 years of assessment. In June 2025, SARS issued assessments on the same basis for the 2021, 2022 and 2023 years of assessment. Subsequent to the end of the current reporting period, the matter on the 2015 to 2023 years of assessment was resolved between both parties through voluntary settlement which is not expected to materially impact annual group results.
- Management has evaluated the half year provisioning amounts for inventory and trade receivables in relation to current economic conditions and believe the current amounts represent adequate cover in light of both qualitative and quantitative factors.

The provision for net realisable value of inventory represents management's estimate of the extent to which merchandise at the reporting date will be sold below cost. The inventory provision of R592m (29 March 2025: R567m) represents 6.0% (29 March 2025: 6.7%) of the inventory balance at half year.

The provision for impairment of trade receivables represents management's estimate of the extent to which trade receivables at the reporting date will not be subsequently recovered. The impairment of total trade receivables provision represents 13.0% (29 March 2025:13.2%) of the trade receivables balance. The gross trade receivables balance at half year increased to R3 008m (29 March 2025: to R3 006m).

- 6. The group has assessed right-of-use assets, intangible assets and goodwill for impairment and no further impairments were required to be recognised.
- 7. The directors and management have reviewed the group's budget and cash flow forecasts, and related solvency and liquidity ratios. They have also considered the current trading environment. On the basis of this review, and in the light of the current financial position and existing borrowing facilities, the directors are satisfied that the group is a going concern and have continued to adopt the going concern basis in preparing the interim results.
- 8. The group purchased an additional 9% of the issued share capital of Blue Falcon Trading 188 (Proprietary) Limited ("Studio 88"), effective 30 March 2025 for a total consideration of R770m. The effective shareholding in Studio 88 increased to 85%. The consideration was settled through cash resources.
- 9. To support supplier liquidity and enable early settlement of invoices, the group has supplier finance arrangements that allow the suppliers to obtain payment from Addendum (the funder) for amounts billed up to 90 days before the invoice due date. As the arrangements do not permit the group to extend finance from the funder by paying them later than the group would have paid its suppliers, the group considers amounts payable to the funder as part of trade and other payables.

As at 27 September 2025, the group had outstanding obligations of R5 660m (29 March 2025: R2 585m) under supplier finance arrangements, presented within trade and other payables in the condensed consolidated statement of financial position. Suppliers have already received payments from the funder of R1 670m (29 March 2025: R1 509m).

The group actively monitors its exposure to liquidity risk arising from these arrangements. No defaults or breaches occurred during the interim period. The arrangements have not materially impacted the group's supplier relationships.

Payments made under these arrangements are classified as cash flows from operating activities, consistent with the classification of trade payables.

10. The fair value of foreign exchange contracts (FECs) and oil hedge options as calculated by the banks is measured using a forward pricing model. The significant inputs into the Level 2 fair value of FECs are yield curves, market interest rates and market foreign exchange rates. The significant inputs into the Level 2 fair value of the oil hedge options are volume (litres), daily ZAR price per litre, market foreign exchange rates and the average month/calculation period. The estimated fair values of recognised financial instruments approximate their carrying amounts.

Durban 20 November 2025
